NESITE®

Confusion below Perfection above

The best in the field of raised floors. Where high performance, safety and elevated aesthetical value become one. That is the creation by Nesite, the Italian company that brought raised floors to the maximum level of creativity and technology. Just as a water-lily hides and host an intricate and confusing life form under water, so Nesite raised floors hide every type of system that makes modern buildings functional, offering a perfect modularity together with the most prestigious finishes.

→ Raising
Your projects

→ Innovative spirit Always pushing forward

Nesite is the brand of reference in the raised floor sector. Being in the field for 50 years, Nesite stands out for its innovative design, its perfect engineering and Italian manufacturing. Nesite's objective has always been to offer innovative, elegant and technically exemplary solutions, joined with high performance and flexibility. Those features make Nesite raised floors a clear reference in the panorama of its specific sector. Nesite, the most innovative Italian company of raised floors.

→ Nesite:
The story of raised floor

1964 Hiross is born, a company producing industrial systems of air-conditioning and raised floors **1964-1990** Hiross becomes a market leader and one of the biggest producers of raised floors in Europe **1996** Nesite acquires all the machinery, know how, certificates, patents and staff of Hiross' raised floor section and creates a company specialized in the sector **2000-2001** Nesite obtains the quality certificates ISO 9001 and 14001 **2002** Nesite opens a second production site dedicated to the production

of high class raised floor in Piove di Sacco (PD) **2009** Nesite inaugurates its first production unit in the UAE with the opening of Floor System Company, a member of the TGS group **2010** Transpack Group Service acquires the brand Nesite and opens its own commercial showroom at Net Centre, in Padua **2011** Renewal of the Quality certification ISO 9001 **2012** Nesite acquires the biggest building site in its history with 150.000 sqm of raised floor (project ITCC, Saudi Arabia) **2013** Renewal of the Quality certification ISO 14001.

→ Identical focus, one only group: Think big to move ahead

Great projects request great networks to be realised. For this reason, since 2010, Nesite became a division of Transpack Group Service Spa, a company of the Transpack group. This transition made Nesite stronger in orienting its products and services towards quality and innovation to be able to determine new performances and creative levels, thus satisfying the most prestigious clients' demands.

→ Transpack Group, a worldwide leader which works in different sectors

Since 1973 the Transpack group has specialised in the industrial packaging production and in the distribution of logistical services.

Throughout the years, by acquiring and founding Newco, it has become one of the main players in the field of integrated logistics. With the intent of business diversification, it has progressively invested in the building and real estate sector, monitored by Transpack Group Service Spa.

The utmost professionalism, great competence, a client-oriented approach, and an International level of experience are the strong points which characterise the entire group. These features, for you, translate into the opportunity to be followed from the design to the construction phase, receiving assistance during all the stages of work. The Transpack group counts on 9 headquarters in Italy and 300 employees in the world.

→ Authentic “made in Italy”, Open to the world

Nesite jealously conserves its “made in Italy” roots. This strong identity breathes throughout the conception, design and manufacturing of its products; at the same time Nesite is able to embrace influences and customisations coming from every country and culture thanks to its international approach. Through a logistical and product refining branch in the United Arab Emirates, Nesite is now able to serve a strategic market such as the south-west of Asia, an area traditionally with an eye for product excellence.

→ Industrial in size, Artisan in the heart: How great customised projects are born

Nesite is where the flexibility of an artisan company joins to the professionalism and potential of an industrial one. An enormous productive capacity combines with the detailed and handmade refinements. That means you will receive a bespoke raised floor, made to your exact specifications but with the lead times of an off-the-rack product.

→ Raised floors for every type of location

The vast range of finishes and solutions make Nesite the most important company in the production of raised floors with prestigious coverings. Whatever the nature of the space where the floors will be laid, whether it is an antique or an ultra-modern building, Nesite's raised floors always respect even the most sophisticated aesthetical need. Emblematic examples can be appreciated in some museums, theatres and historical buildings converted for different uses.

→ Respect
for the environment

→ Leed Contribution: Leadership in Energy and Environmental Design

Nesite has always cared about the environment, using exclusively recycled and recyclable materials certificated by accredited authorities for the production of its raised floor. Nesite, indeed, contributes to the “Leed” evaluation of buildings, consenting them to be awarded the maximum credits relative to raised floors. A prime example of this is Christchurch’s Civil Building, which was defined as the most eco-compatible building in New Zealand and obtained the “leed platinum” certification. 16,000 sqm of Nesite raised floor were installed there.

→ A long story
with deep roots

→ Competence and Precision

Dealing with difficult and prestigious projects for years has given us enough competence to be involved in any type of job proposal, even those with highly-binding technical performances. The compliance with the sector's normative is absolutely guaranteed. Nesite products are multi-certified for their mechanical and fire performances and for their acoustic absorption properties, all in line with the latest European norms.

→ International support and services worldwide

Nesite has realized more than 7,000 ambitious projects touching all continents, in the main countries of the world: from Russia to the USA, from Australia to South Africa. Moreover, we have been present in Sharjah with an establishment since 2008 and we have recently opened a new showroom in Dubai. Nesite has shown a pronounced vocation for the Middle-East, where we have already realised important and prestigious works in the latest few years.

→ Our mission:
Explore new directions
towards new solutions

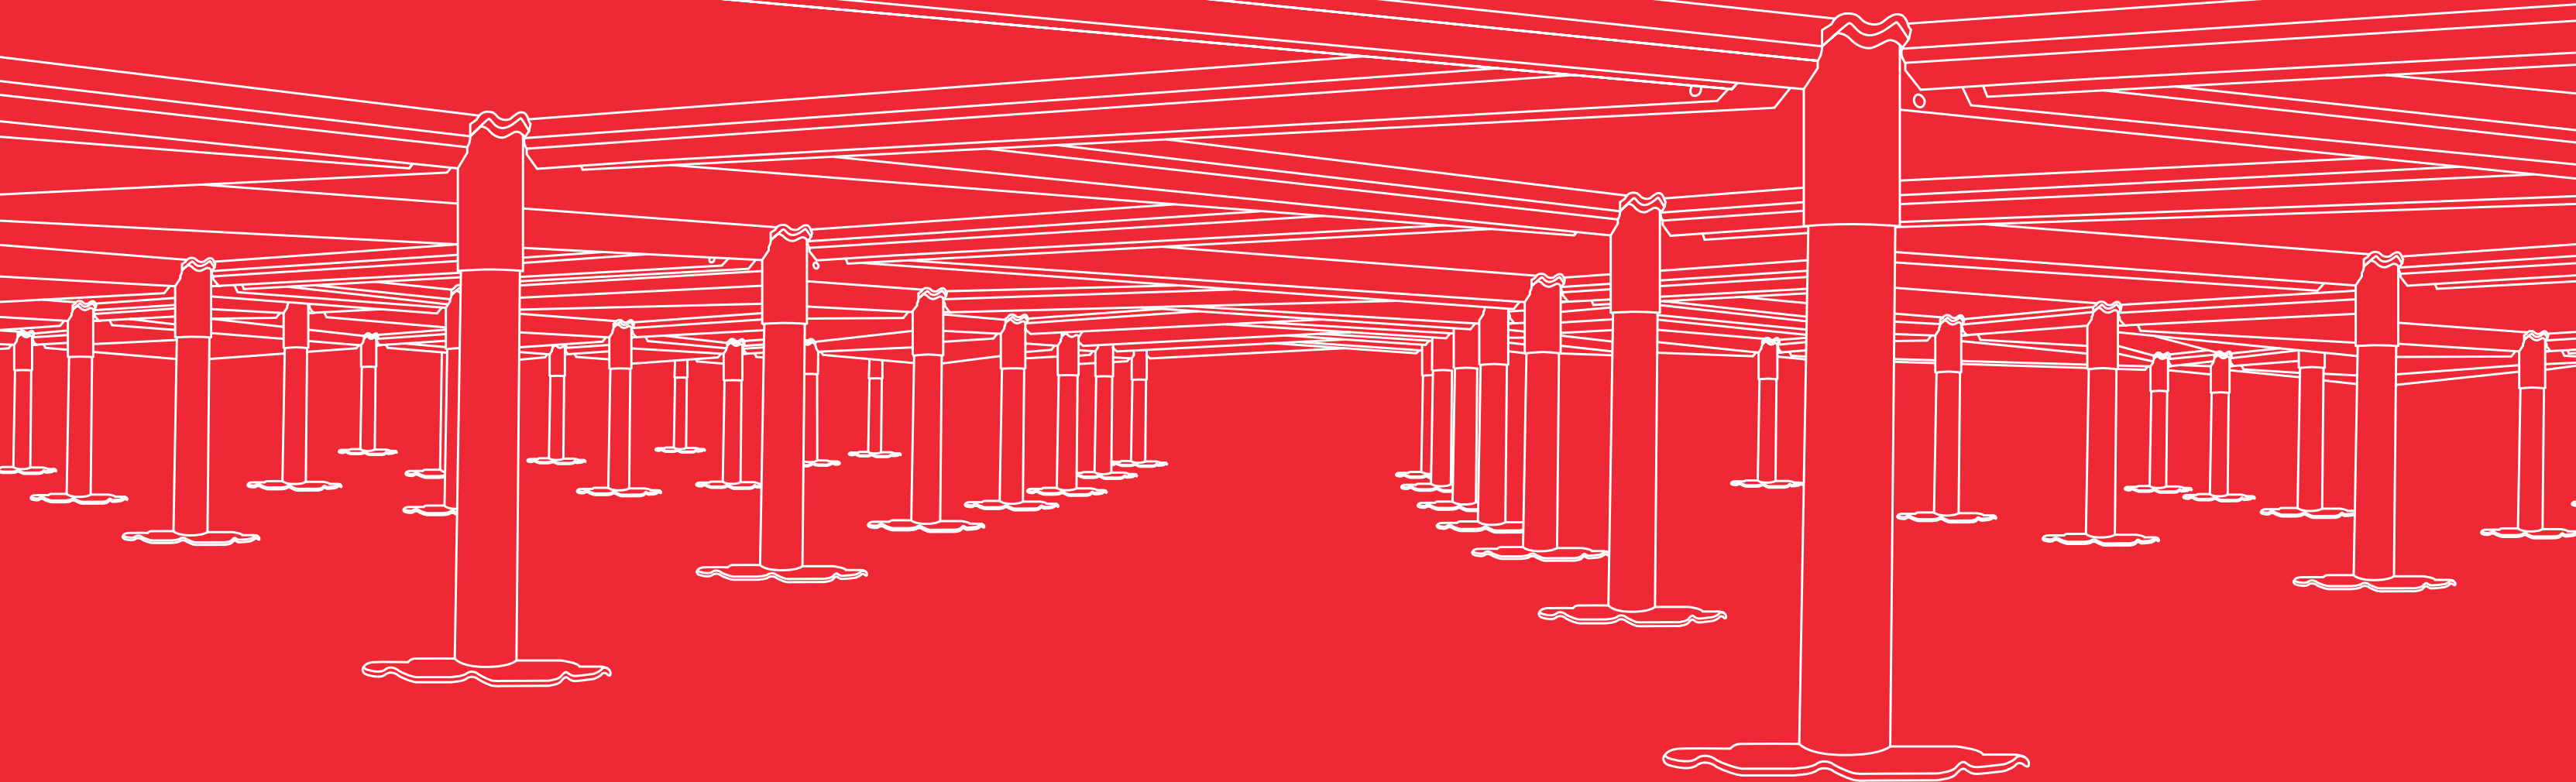

→ High-level floors

Raised floors have become essential for all modern buildings thanks to their unquestionable advantages in terms of flexibility of layout and cost saving during both design and implementation. With Nesite, there are no limits to aesthetic, functionality and technique. Thanks to its long experience, Nesite is the most trustworthy partner in the supply of raised floors that can guarantee the highest performances; the height we can reach goes from 7 to 180 cm, always ensuring the maximum stability and security.

Christchurch, Canterbury, New Zealand

→ A well supported system

→ A vast range of innovative solutions

No other producer offers such a vast choice of products in the field of raised floors. Nesite, constantly searching for innovation, includes in its production new floor systems such as, for example, Tetris Floor; it is a tongue & groove calcium sulphate system that can be inserted in interiors where just a partial accessibility to the subfloor is requested.

Twin Floor is a ceramic or stone floor only 25 mm thick, which provides high mechanical resistance, available for both interior and exterior and for all the places where there is a high level of humidity.

Finally, Diffuse is the new radiant raised floor by Nesite, which offers excellent comfort and energy saving characteristics, ensuring total and easy accessibility to the subfloor.

Let's look ahead together at new horizons

Our vision of the future and our determination to reach it make us a winning company. But determination must be backed up with competence and competitiveness, and look ahead towards ambitious horizons. We must be certain that our achievements are in our hands, in our capacity to dare and succeed. Thanks to a particular awareness towards the development of new technologies and the capacity to evaluate and anticipate the ever changing needs, Nesite will be able to deal with the developments of its specific market with confidence in the final result. An engaging challenge to be experienced together!!
