MILANO DESIGN WEEK 2019

press kit

This year, Nesite will be present for the first time at Fuori Salone in two prestigious locations.

The first one is in Via Tortona 34, in the showroom sanwa by simonepiva, the new brand of Transpack Group that supports Nesite in offering "tailor - made" solutions in the workspace furniture sector.

Here will be exposed the collection "The impact of Compact" by sanwacompany, the Japanese brand that for 40 years stands out for selling products that combine the most advanced Japanese technology.

"The Impact of Compact" is the new collection of compact kitchens, combining sophisticated contemporary and minimalist design, perfect for work spaces.

"Tourner la carte", a monoblock kitchen born from the collaboration between Simone Piva and Elisa Ossino, designed to transform itself giving the possibility to move and hide the induction cooktops and the sinks completely redesigning the work area, will also be exposed.

The second location is on the third floor of Via Solferino 11, inside the "Perfect Darkness" space, an apartment installation by Elisa Ossino Studio that proposes a new concept of home.

The focus of this project is the use of H + O tiles, a new brand born out from the collaboration between Elisa Ossino and Josephine Akvama Hoffmeyer, Artistic Director of File Under Pop, as an element that characterizes the spaces.

The choice of colors and patterns makes each room a unique installation, where finishes and customized furnishings are protagonists of the space.

Here Nesite is present as technical sponsor, with tailor-made furniture made by simonepiva and a customized raised floor that allows the insertion of the tiles in a flexible and modular way, offering the possibility to change the floor pattern.

ABOUT NESITE

NESITE, brand of Transpack Group, is the reference point in the in the raised floor sector. Since 50 years the company's goal is to offer solutions that can satisfy both the technical and aesthetic requirements, "elevating" the floor from a purely technical system to a furniture that can be a key element of the space where it is installed. Hence the innovative drive of the company, that over the years has developed highly customized products for complex and prestigious international projects, combining the typical flexibility of the artisan company with the professionalism and production capacity of the big industry.

With the Contract Division, in addition to raised floor, Nesite is able to offer solutions which ensure harmony of spaces and a perfect integration of all products, from flooring to partitions, finish materials, office furniture, lighting and decorative elements.
