new products

We are constantly looking for solutions that bring innovation and comfort to indoor and outdoor spaces. Our product range is rich in proposals that can add value to any stylistic approach or design requirement, even made-to-measure.

CUSTOMIZABLE RAISED FLOOR WITH RESIN FINISHING.

With 4.0 you can decide:

- your colour from RAL scale
- opacity (glossy, semi-gloss and opaque).
- finishing (standard or embossed).
- graphic elements, inserted through a particular digital process, for a further customization of the floor.

FINISHING WITH ZERO IMPACT ON THE ENVIRONMENT OF EXCELLENT MECHANICAL AND PHYSICAL CHARACTERISTICS:

- excellent thermal insulation.
- anti-static.
- acoustic improvement.
- footfall comfort.
- water-repellent and non-absorbent.
- 100% recyclable.
- wide range of finishings.

flora

FLOORA IS THE FLEXIBLE SYSTEM OF FLOOR PLANTS, INTERCHANGEABLE WITH THE RAISED FLOOR PANELS, WHICH ALLOWS YOU TO DESIGN CUSTOMIZED GREEN AREAS IN INDOOR SPACES.

The 60x60 cm module is suitable for any type of raised floor, even existing ones, in which the panels can be replaced at will.

The simplicity of composition makes it possible to create green islands or green paths in just a few hours, choosing from plants of various types and heights, which can be used as decorative or dividing elements.

n e s i t e

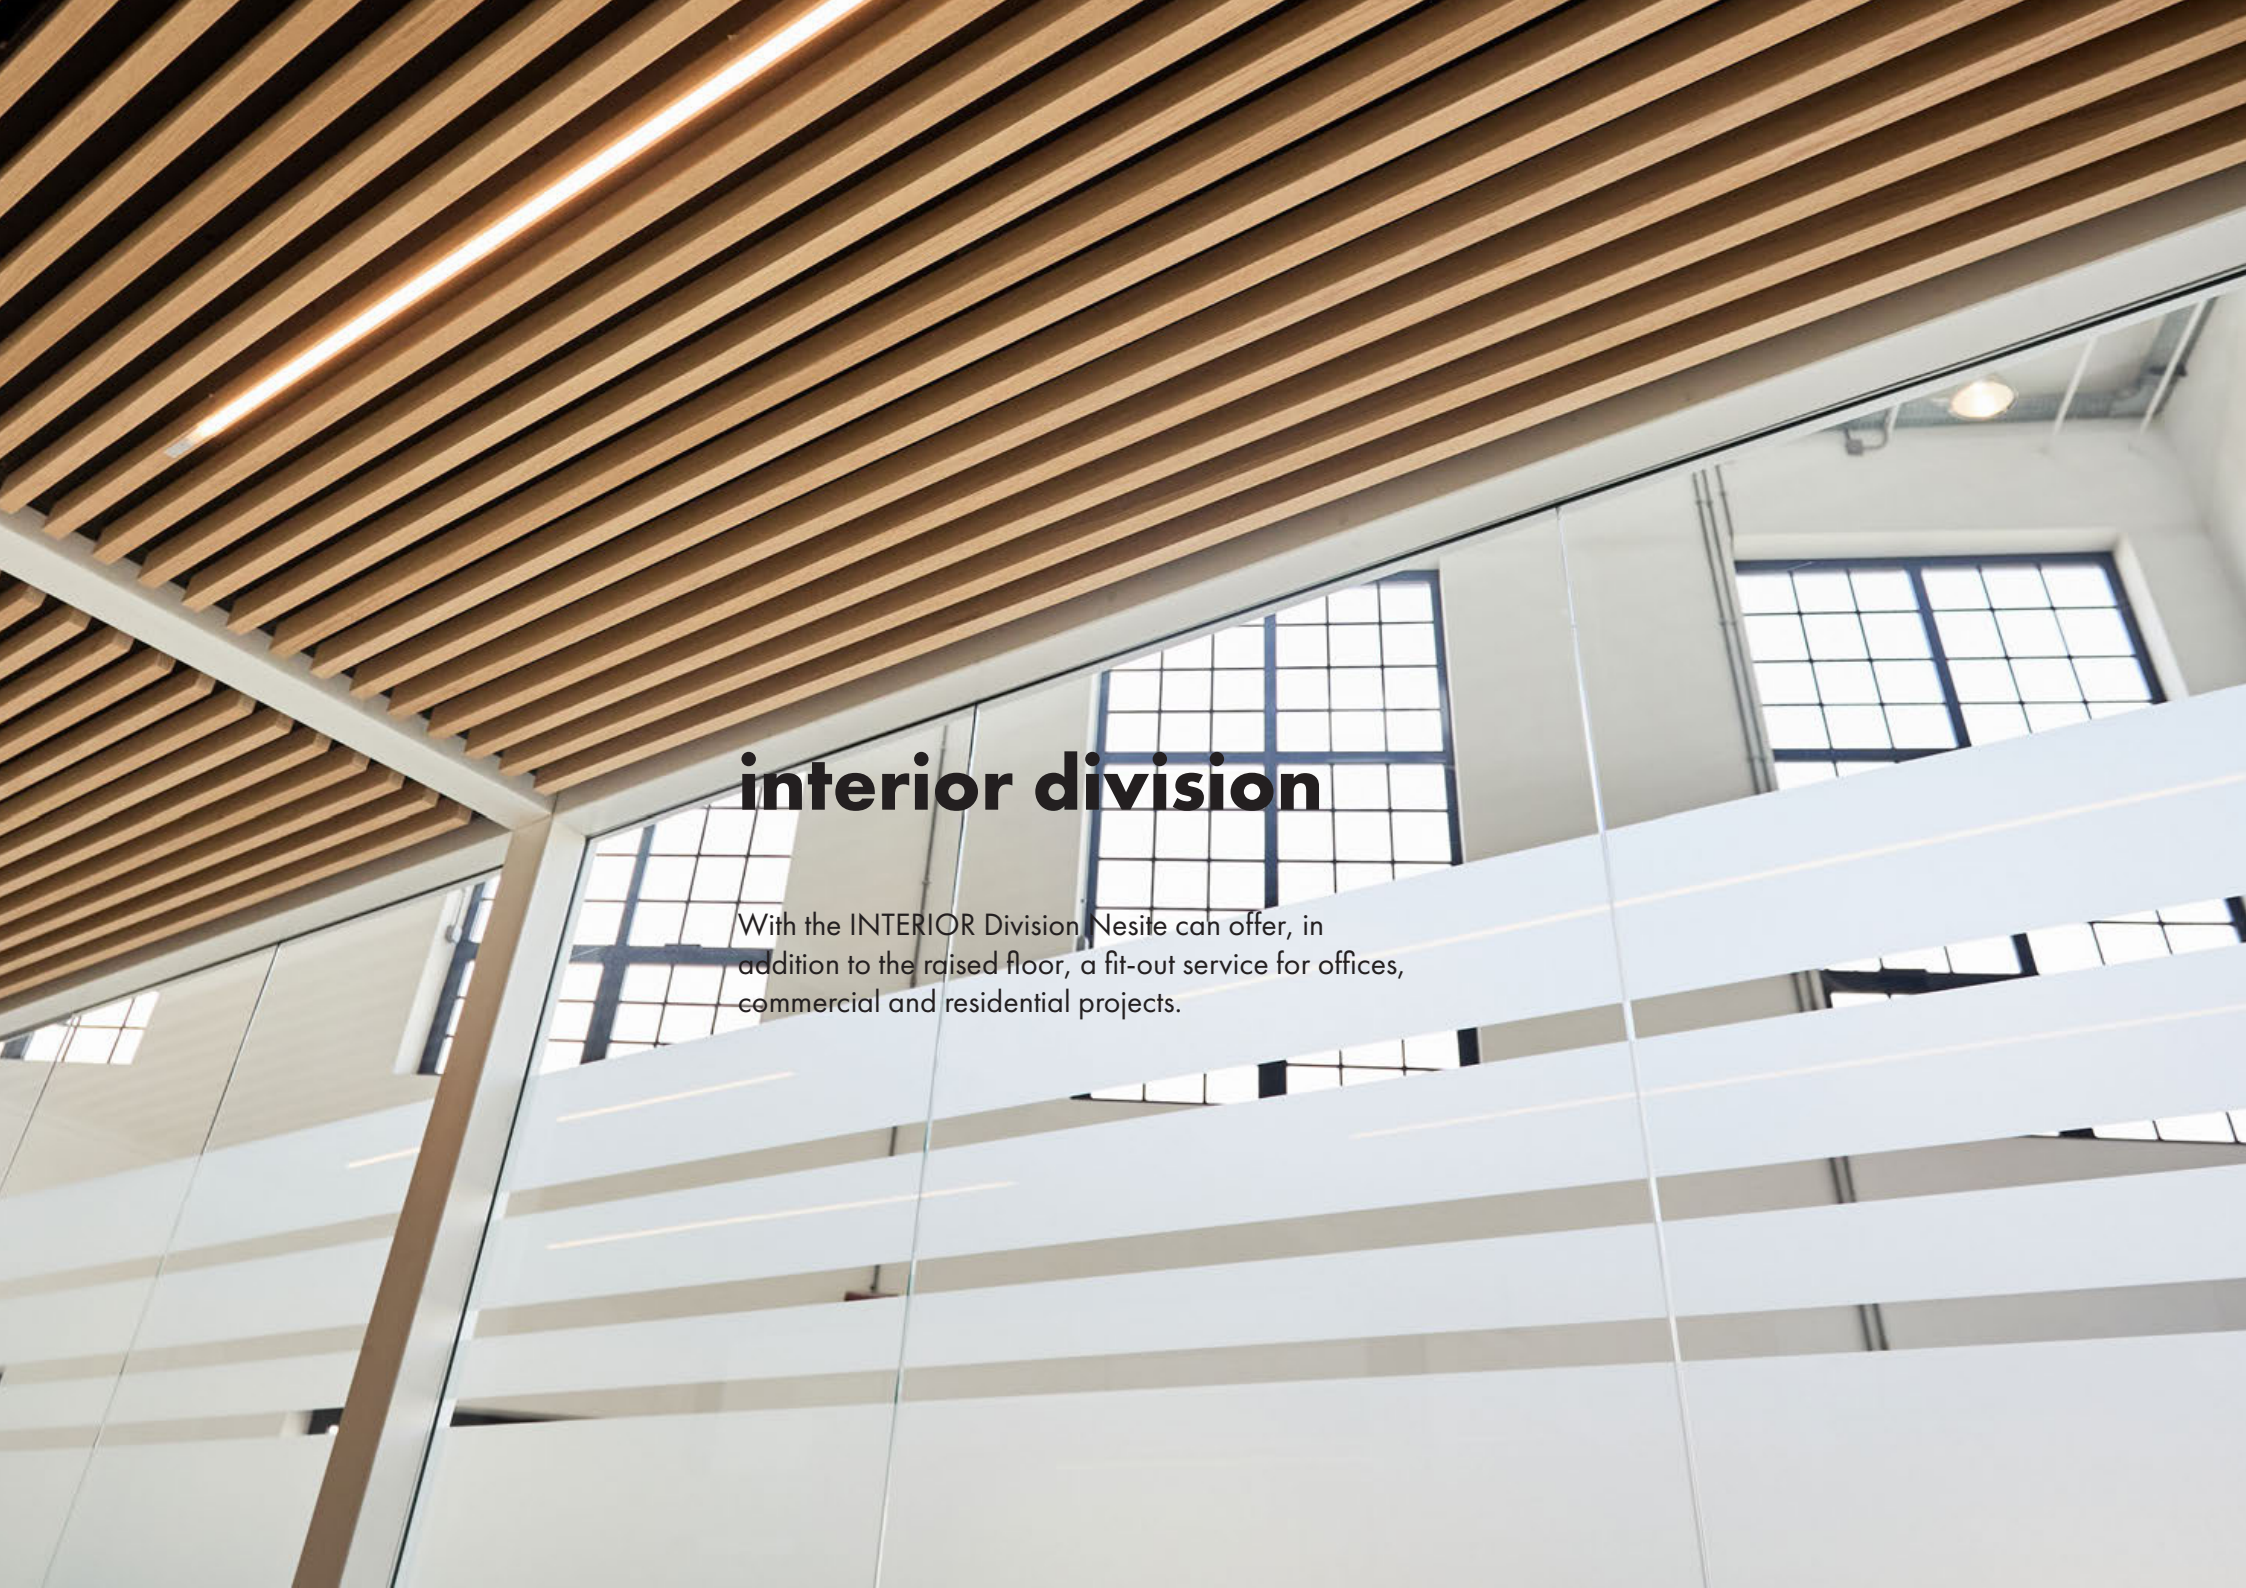

par-ky

PAR-KY IS THE NEW ECO-FRIENDLY ENGINEERED COVERING, COMPOSED OF A HIGH DENSITY WOOD FIBRE CORE (HDF) AND A REAL WOOD TOP SURFACE.

- high resistance.
- free of COV or any volatile component.
- Environmental compatibility.
- LEED contribute.
- 100% recyclable.
- Available in FSC certified version
- wide range of finishings.

RAISED ACCESS FLOOR
NESITE.COM

A low-angle, upward-looking shot of a modern building's interior. The ceiling is composed of numerous parallel wooden slats, with a long, narrow light fixture integrated into them. Below the ceiling, a series of white, curved glass railings form a staircase or mezzanine level. Large, multi-paned windows are visible in the background, allowing natural light to enter the space. The overall aesthetic is clean, minimalist, and architectural.

interior division

With the INTERIOR Division, Nesite can offer, in addition to the raised floor, a fit-out service for offices, commercial and residential projects.

n e s i t e

kairos

INTEGRATED PARTITION WALL-FLOOR SYSTEM

Raised floors, partition walls and false ceilings, 3 elements that until now have been separate, finally merging into a single Integrated System. A new way of building spaces with rationality, functionality and elegance.
